

Khadidja Laibi

Full-Stack Web & Mobile Developer — React, Node.js, Laravel, Flutter

I build production-grade web and mobile platforms end-to-end — scalable REST/GraphQL APIs, role-based admin systems, and clean, business-focused delivery.

Algiers, Algeria | laibikhadidja97@gmail.com | github.com/laibikhadidja97-bit | linkedin.com/in/khadidjalaibi-90670725b

PROFESSIONAL SUMMARY

Full-Stack Web & Mobile Developer with 7 years of experience delivering production platforms end-to-end. I build multi-role SaaS systems — REST/GraphQL APIs, secure role-based authentication, and admin dashboards — with React/TypeScript, Node.js, and Laravel, plus Flutter mobile apps. Proven record shipping ERP/accounting (ZATCA e-invoicing), e-commerce/auction, and sports-management platforms with real payment, tax, and shipping integrations and full Arabic/RTL support.

CORE STRENGTHS

- Multi-tenant, role-based platforms (Admin / Vendor / User), end-to-end
- REST & GraphQL API design with secure authentication (JWT, Sanctum)
- ERP / POS systems and ZATCA (Fatoora) e-invoicing compliance
- Payment, tax & shipping integrations (MyFatoorah, Torod, ZATCA)
- Admin dashboards, Arabic / RTL, and deployment-ready releases

TECHNICAL SKILLS

- **Frontend:** React.js, TypeScript, JavaScript (ES6+), Vite, MUI, TanStack, TailwindCSS, Responsive & RTL
- **Backend:** Node.js, Express, Laravel (PHP 8), GraphQL (Apollo), REST APIs, Prisma, Sequelize
- **Mobile:** Flutter, FlutterFlow, Android & iOS, Firebase
- **Databases & Auth:** MySQL, SQLite, Firebase; JWT, Laravel Sanctum, Spatie Permission, Socket.IO
- **Tools:** Git, GitHub, deployment, testing, CORS/runtime configuration

PROFESSIONAL EXPERIENCE

Full-Stack Web & Mobile Developer — HOSKADEV | Jan 2023 – Present · Full-time

- Deliver and maintain production web & mobile platforms across frontend and backend, from requirements to deployment.
- Design scalable REST/GraphQL APIs, role-based authentication, and admin operations for multi-user business systems.

Full-Stack Web & Mobile Developer — GAMADEV | Mar 2019 – Jan 2023 · El Oued, Algeria

- Delivered full-stack web & mobile applications end-to-end, from requirements gathering to launch.
- Built backend modules, authentication workflows, and database schemas; improved reliability of deployed systems.

SELECTED PROJECTS

ERP & POS Accounting System — ZATCA e-Invoicing | Full-Stack Developer

Laravel 10 · PHP 8.1 · Sanctum · Spatie Permission · React · Vite · MUI · MySQL · ZATCA (Fatoora)

- Built a full ERP + point-of-sale accounting platform: invoicing, sales, quotations, inventory, and financial reporting.
- Integrated ZATCA (Fatoora) Phase-2 e-invoicing: cryptographic invoice signing, QR codes, and compliant XML for the Saudi tax authority.
- Implemented role-based access (Spatie Permission), a thermal-printer POS with cash/card split, and Excel/PDF exports.

Omkooora / Tomoh — Sports Club Management SaaS | Full-Stack Developer · omkooora.com

Node.js · GraphQL (Apollo) · Sequelize · MySQL · Socket.IO · JWT · Next.js · React

- Multi-tenant sports platform: 7 role-based web apps (clubs, teams, leagues, players, referees) on a single GraphQL API.
- Built per-app JWT authentication and player transfer/loan workflows; fixed a production loan-return defect with a reproduction and regression tests.

Otoor Marketplace (Fragraworld) | Full-Stack Developer · fragraworld.com

React · TypeScript · Vite · TailwindCSS · Node.js · Express · Prisma · MySQL · Socket.IO · JWT

- Multi-vendor e-commerce & auction platform with storefront, seller space, and admin (Admin/Seller/Buyer roles) for orders, auctions, coupons, and returns.
- Integrated shipping and payments (Torod, MyFatoorah) for live transactions; stabilized releases by resolving migration/DB-sync issues.

Doctors Directory | Full-Stack Developer · whoismypsychologist.com

Laravel 12 · PHP 8.2 · Sanctum · Spatie Permission · React · Vite · TypeScript · TailwindCSS

- Complete platform (frontend + API) for patients, doctors, and administrators with secure token-based authentication.
- Stabilized dev/QA workflows: fixed migrations, seeded 151 doctors, and configured runtime/CORS correctly.

EDUCATION & CERTIFICATIONS

M.Sc. Computer Science — Distributed Systems & AI, University of El Oued (2021)

B.Sc. (Licence) Computer Science — Information Systems, University of El Oued (2019)

Certifications: Machine Learning — Supervised Learning (Dec 2025); Python & Git: Programming Essentials (Nov 2025) — Facker AI.

LANGUAGES & AVAILABILITY

Languages: Arabic (Native), English (Intermediate), French (Intermediate) | **Availability:** On-site or remote, full-time or part-time
